HARNESS

CROSS.AIR (CODE) GREEN

HARNESS TECHNOLOGY – CROSS.AIR (CODE) GREEN

The successful harness series CROSS.AIR is available now as **CODE GREEN** limited edition to perfectly match the sail color of your CODE GREEN Voodoo, Ice or Duke.

THE AIRBAG REVOLUTION

The most decisive criterion for a harness is the fit. Since people are built differently, we have devised the ultimate solution for an individual adjustment: the integrated **CONTOUR.AIRBAG**. These inflatable air chambers are located in the lumbar spine area and can be perfectly adjusted to the contours of the rider's body. At the same time, they gently absorb peak loads and evenly distribute them on a larger area. Using the variable air pressure, the rider can vary the absorption between extremely soft and sportyhard. Harnesses have never been more comfortable.

NORTH SAILS WUNDER.BAR

The culmination of comfort and safety! Thanks to the patented closure, the strap only needs to be adjusted once and never needs to be readjusted again. Getting in and out of the harness is now very fast thanks to the new „u-claw“, which also reliably prevents unintentional opening of the harness even under extreme conditions.

NEW FEATURES

To achieve the ideal mixture of hard, direct power transmission and comfort, we opted for a combination of classic harness construction and the innovations of **3D moulded** harnesses. This means that we process only partially preshaped patches to avoid making the harness too inflexible. These patches are covered with very soft Lycra to avoid grazing the skin when surfing stripped to the waist.

HARNESS TECHNOLOGY – CROSS.AIR (CODE) GREEN

CROSS.AIR (CODE) GREEN '08

wave < > freeride

Sizes: XS, S, M, L, XL

High hook position provides ideal freedom of movement on the wave, available with the CONTOUR.AIRBAG.

An anti-slip, wrinkle-free 3D neoprene inner belt and the back plate distribute pressure over the entire pelvis, ensuring an optimum fit for the harness. Moreover, optional front protectors can be attached to the hook.

The CROSS.AIR also features the new COMFORT.CUTOUPS on the outside and two 3D MOLDED.SIDE.PATCHES on the inside, providing for an excellent fit and effectively preventing the harness from slipping upwards.

Two-point strap system.

An XS size was specially developed for ladies.
