100% DEPOWER

WE DID IT FIRST!!

The type wave bar introduced in October 2004 is the first system that allows a complete de-powerability of your kite.

The combination of the new 2006 TOTAL DE-POWER BAR on the Type 7 kite as an optional or on the Type Wave 2 as a standard bar, completely re-defines the possibility of riding "classic", test proven inflatable kites, without the need of re-designing special new kites, like other manufacturers have done.

RRR has been the first kite company to have a bar system that allows to completely De-power your kite.

From 100% to 0% power in 1 SECOND.
